

Job Title: Synthetic Organic Chemist

Location: Alderley Park, Macclesfield, UK

Salary: £23,000 - £32,000 (depending on experience) and other excellent benefits

Apex Molecular, a rapidly expanding chemistry contract research organization (CRO) based in Cheshire, England, is currently looking for Synthetic Organic Chemists (multiple vacancies) to join our growing contract research and medicinal chemistry teams.

The successful applicants will experience the full variety of chemistry within Apex Molecular including:

- Custom synthesis projects on small, lab scale up to 20 litre scale
- TE projects synthesising compound libraries for testing in medicinal chemistry lead identification / lead optimisation programs
- Handling and synthesis of highly potent active pharmaceutical ingredients

They will work closely with our existing experienced contract synthesis and research chemistry teams, and communicate directly with customers to continue to deliver the levels of technical excellence and customer service we pride ourselves on.

Within our labs we are equipped to work on milligram to kilogram scale chemistry and have high quality analytical facilities both in-house and through the site open access analytical laboratory. In addition, with our dedicated high potency laboratory facility we also offer the synthesis of hormones, opioids, prostaglandins and cytotoxic oncology small molecules associated with antibody drug conjugates (ADCs).

Synthetic Organic Chemist skills and attributes

- Previous experience in practical organic chemistry
- Educated to a BSc/MChem level is essential
- Qualified in a chemistry based subject to PhD level is highly desirable
- Experience gained in pharmaceuticals, life sciences or agrochemical sectors desirable
- Additional experience in medicinal chemistry drug design or the synthesis of high potency small molecules is advantageous

Company Benefits

- Annual salary of £23,000 - £32,000 (depending on experience)
- Contributory pension scheme
- Other excellent benefits

To apply for the Synthetic Organic Chemist position, please send your CV to info@apexmolecular.com
